

Lifetime Leadership Skills

Westminster encourages lifetime learning, which is enabled by the development of specific intellectual skills. Breakthrough general education requirements places particular emphasis on skills that are needed for success in the 21st century. To this end, Westminster students will take courses that allow them to sharpen their skills in written and oral communication, information and digital literacy, and research inquiry and analysis.

Skill	Course	Semester	Hours
Writing Intensive: two courses (at least one must be an upper-level course); three courses if transferring in ENG 103			
Oral Communication: one course			
Information and Digital Literacy: one course			
Research: Inquiry and Analysis one course			

Communication: Communication includes the ability to write, speak, read, and listen effectively. Development of these skills is essential for preparing students to be confident communicators with the capacity to convey, engage, apply, and reflect on knowledge accessed within their chosen fields.

Writing Intensive: Westminster students must earn credit in two Writing Intensive courses, one of which must be upper level, to fulfill this portion of the Lifetime Leadership Skills. Students transferring credit in composition must take three WI courses and at least one of the courses must be upper-level. Some professors may offer a course as “Writing Intensive Option” in order to allow a limited number of students to take the course for Writing Intensive credit; it is the student's responsibility to get permission from the instructor of a Writing Intensive option course and to submit the electronic form to the Registrar's Office in order to receive Writing Intensive credit. Writing Intensive courses will be designated with “WI” and Writing Intensive Option courses will be designated with “WIO” in parenthesis after the title of the class.

Information and Digital Literacy: Westminster prioritizes development of the skill of information technology, or the ability to employ computer and other technologies in writing, in the manipulation of data, and in understanding the nature and limits of technology. To adapt to

rapidly changing technology tools, students should have both information and digital literacy. This implies the ability to access, retrieve, evaluate, manage, and use information effectively and efficiently from a variety of print, non-print, and digital sources through the use of computer and other information technologies.

It is recommended students meet the Information and Digital Literacy skill in their chosen field of study. This skill is addressed throughout the curriculum as indicated by courses tagged as IDL. While courses are not designated IDL in the catalog, they are noted as such in the Schedule of Classes published each semester.

Approved Information and Digital Literacy Courses:

- MAT 351: Methods of Teaching Elementary & Middle School Mathematics
- PSY 270: Research Tools

Research Inquiry and Analysis: Active learning, analysis, and application are essential for the development of mature critical thinking. In order to further student's development in higher-level thinking, there must be an emphasis on inquiry and analysis. Inquiry is a systematic process of exploring issues/ objects/works through the collection and analysis of evidence that results in informed conclusions. Analysis is the process of investigating complex topics or issues in order to gain a better understanding of the factors that interact and shape relationships, outcomes, or events.

Completing this process of research will help students to apply the tools, theories, and conventions of their field to a specific area of inquiry. Therefore, courses that meet this skill (tagged as RIA) should be taken within the student's field or chosen in consultation with their department.

Approved Research Inquiry and Analysis Courses:

- BIO 204: Animal Behavior
- BIO 404: Biochemistry
- BIO 420: Physiology
- BUS 353: Non-Profit Management
