The Departments of Biology and Chemistry offer an interdisciplinary major program of study to a Bachelor of Arts in Biochemistry. The major program is structured into two tracks, biological emphasis and chemical emphasis, to allow the student to pursue a more advanced study of biochemistry to fulfill their particular interests and professional goals. Both tracks require introductory biology and chemistry courses with emphasis on fundamental concepts and give students a clear insight into the underlying biological and chemical principles. The Biodiversity, Biological Processes and General Chemistry courses fulfill the general degree requirements for a course in Laboratory science as well as serving as foundation courses for biochemistry students.

Students completing a Biology or Chemistry major may not also receive a Biochemistry major. Students majoring in Biochemistry cannot obtain a second major or minor in Biology or Chemistry.

The Departments strongly recommend that students majoring in Biochemistry (Biological Emphasis) take Calculus through Calculus II (MAT 124 and MAT 214) and Physics I and II (PHY 201 and PHY 212). Any student who elects to take BIO 404, Biochemistry, must have successfully completed both semesters of Organic Chemistry or be currently taking CHM 324/325. No more than four hours of BIO 398 Independent Study Research Projects, may be counted toward the major. Students must earn a letter grade of C- or better in all courses needed to satisfy major requirements.

Biochemistry Honors: This designation would be given for Biochemistry majors who meet the following criteria.

1. GPA  $\geq$  3.3 average for all BIO courses
2. Two semesters for independent, hypothesis-driven research
  - a. Preferable: A single project carried out over 2 semesters for a total of 4-6 hours of independent study
  - b. Alternatively:
    - i. Two single semesters for a total of 4-6 hours of independent study
    - ii. A summer Research Experience for Undergraduates (REU) or similar type of research experience and a single semester (2-3 hours). These projects MUST be preapproved and must be accompanied by a formal campus presentation.
3. A formal thesis/paper that is evaluated by at least two faculty members
4. An oral or poster presentation at the Undergraduate Scholars forum or at a local, regional, or national conference

At least 50% of all BIO and CHM hours needed to satisfy the major (22-24) must be Westminster courses.
