Political Science is a scientific and humanistic discipline that attempts to explain and evaluate politics and political systems in terms of fundamental empirical theories and general normative principles. Political science thus seeks not only to understand the struggles for power and influence that determine who gets what, when and how, but also to ascertain the best or most appropriate way for human beings to live together both within societies and the world community. Both the major and minor in political science are designed to give students a solid grounding in the three main sub-fields of the discipline: American government and politics; comparative politics; and international relations and security. The major program is further structured into three "tracks" to allow students to pursue a more advanced study of politics and government in a manner that is most conducive to their particular interests and professional goals.

All students majoring in political science **must complete** the three introductory courses. They are urged to take POL 112 and 211 before POL 212. **All three introductory courses should be completed by the end of the sophomore year.**

Students contemplating graduate school in political science are strongly encouraged to take at least two semesters of a foreign language, Introduction to Computers, an advanced course in statistics, and a relevant methods course such as MAT 313, PSY 270, PSY 274, or ECN 367, or preferably POL/SOC 300, Social Science Research Methods.

All departmental majors must have an overall 2.0 average or better in all courses presented to satisfy the major requirements, including courses in the Pre-Law and Security Studies minors for the tracks two and three.

Westminster College and Missouri State University have entered into an agreement whereby Westminster students, majoring in either Security Studies or Political Science with a Security Studies track, may take courses through Missouri State's Defense and Strategic Studies Graduate Department. These may include Seated courses, Internet courses, and Web Conference courses. Permission to take these courses must be granted by Westminster College before students may enroll. The College will annually determine with Missouri State annual costs for these courses. Offered each semester

PHL/REL 102 World Religions (3 hrs.) One of the most pressing problems of the 21st century is religious pluralism: We live in a world, in a nation, and in an academic community that is religiously diverse. How will we relate to persons who are different from one another and from us in terms of religious orientation? Will we choose to relate in ways that are healthy or ways that are harmful? For unless we know what persons of faith believe and value and do, we cannot relate in positive ways to them. This course will strive to understand a number of the varied religious traditions of the world in a way that is fair, open-minded, objective, and kind. “Agreeing” with the various religions we will be studying is not required; however, “understanding” them is. Typically offered every semester.

PHL 120 History of Philosophy (3 hrs.) This course explores the history of western philosophy with an emphasis on the ancient, medieval and modern philosophical eras. Pursued chronologically, most attention is given to central figures such as Socrates, Plato, Aristotle, Aquinas, Descartes, Locke, Hume and Kant though a broader range will be investigated with an emphasis on their views relating to ethics, political theory, and metaphysics/epistemology (relating to the nature of reality and how we come to know such). Theories and principles are then applied to a sampling of biomedical cases such as the following: severely impaired newborns and their parents’ right to refuse treatment for them; the justification for genetic manipulation and screening; physician-assisted suicide; doctor-patient confidentiality and informed consent; the use of fetal-cell tissues; living wills and their relationship to personal identity. The readings include analyses by physicians, jurists, and philosophers of the ethical and philosophical questions raised by the cases and issues considered.

Offered every other spring semester.

PHL 302 The Meaning of Life (3 hrs.) What is the meaning of life? Most of us have asked this question of ourselves and perhaps of other people we respected. For, in addition to understanding the world in which we live, we want to make sense of how to make our own lives as meaningful as possible to know not only why we're living, but that we're living our lives with intention, purpose, and commitment. Through interesting and pertinent books, writing selections, films, and a community service/experiential learning project, this course will address this profound, abstract, and personal question. Prerequisite: One PHL or REL course, or permission of the instructors.

Philosophy itself was foundational to scientific inquiry, though its approach differs from both science and religion and can also be seen by some as adversarial to each.
